

Stride Property

439 Rosebank Road

Project Summary

This project consists of the development of two new warehouse and office buildings (Building A and Building B) to provide 4 new warehouse premises at 439 Rosebank Road, Rosebank.

Building A comprises a 1985m² warehouse with three 400m² offices, located along the southern elevation (200m² per level). Building B comprises a 3955m² warehouse with a two-storey 400m² office (200m² per level) in the southeast corner. There is an automatic sprinkler system provided throughout both buildings.

Fire design developed in accordance with the C/VM2 framework

Crossfire Value to Project

Crossfire developed a performance-based design to enable optimal design flexibility with no fire or smoke separations between office levels and between office and warehouse.

We developed the fire design to the C/VM2 which resulted in a reduced construction cost and more open office to warehouse interface than from that required by an Acceptable Solution design.
